

Danger Level 2 - Moderate

Tendency: Constant avalanche danger →
on Tuesday 31 03 2020

New snow

Treeline

As a consequence of fresh snow and wind a moderate avalanche danger will prevail.

The Avalanche Warning Service currently has only a small amount of information that has been collected in the field.

The fresh snow will be deposited on the unfavourable surface of an old snowpack in all aspects. The wind slabs represent the main danger. These can sometimes be released by small loads, especially on very steep slopes in all aspects in particular above the tree line. Mostly the dry avalanches are medium-sized.

Natural avalanches are to be expected, caution is to be exercised in particular at the base of rock walls and behind abrupt changes in the terrain above the tree line as well as on very steep slopes.

Snowpack

Danger patterns

dp 6: cold, loose snow and wind

Over a wide area 20 to 30 cm of snow, and even more in some localities, will fall above approximately 1000 m. Over a wide area fresh snow is lying on a hard crust. It is bonding poorly with the old snowpack in all aspects.

Tendency

The avalanche danger will persist.

Danger Level 2 - Moderate

Tendency: Constant avalanche danger →

Wind-drifted
snow

Treeline

As a consequence of fresh snow and wind a moderate avalanche danger will prevail.

The Avalanche Warning Service currently has only a small amount of information that has been collected in the field.

The wind slabs represent the main danger. These can sometimes be released by small loads, especially on very steep slopes in all aspects in particular above the tree line. In some cases the dry avalanches are medium-sized.

Snowpack

Danger patterns

dp 6: cold, loose snow and wind

Over a wide area 10 to 20 cm of snow, and even more in some localities, will fall. Over a wide area fresh snow and wind slabs are lying on a hard crust. The weather will be cold. The brittle wind slabs remain for the foreseeable future prone to triggering.

Tendency

Gradual decrease in avalanche danger as the snowfall eases.
