

## Danger Level 1 - Low

**Tendency: Constant avalanche danger** →  
on Friday 19 04 2024

Gliding snow

2600m

Frequency: **few**

Avalanche size: **medium**

### Gliding snow requires caution.

Individual medium-sized gliding avalanches are possible. This applies in particular on steep grassy slopes below approximately 2600 m. Areas with glide cracks are to be avoided.

In steep terrain there is a danger of falling on the hard crust.

## Snowpack

**Danger patterns**

dp.2: gliding snow

Some snow will fall in some localities. The snowpack is wet all the way through and its surface has a strong crust. This applies on sunny slopes in all altitude zones, as well as on shady slopes below approximately 2600 m.

In particular below the tree line only a little snow is now lying.

## Tendency

Low avalanche danger will persist. Gliding snow requires caution.
